 T4 AI ASSISTANT

T4 AI Assistant: Talk to your documents. Find what you need instantly.

T4 AI Assistant is a **customizable internal AI assistant** that lets your team get answers **from your data: internal documents, systems, and knowledge bases**, through simple, **conversational questions**. Instead of searching across folders or relying on colleagues, employees can just **"talk to your documents"** and get what they need **instantly.**

It **speeds up daily work, reduces repetitive questions, supports onboarding**, and ensures everyone has access to **the right information at the right time.**

Key Features:

Finds answers across documents, systems and tools

Users can manage and update their own data sets

Works with fast-changing data in real time

Easy to integrate - MS Teams, Slack, Jira, intranet or your own products for customers

Assistant behavior can be customized to your business

Secure deployment - private cloud, public cloud or on-premise

Not limited to one model – supports multiple LLMs with load balancing
Traceable responses – every answer links to its source

Built with strong privacy and security standards

Configuration & Customization

· Upload your internal documents via a simple admin interface

· Option to set up automated document scraping and dataset updates
· Always working with the latest information
· Define assistant "persona" – how it communicates, what tone it uses
· Can also be embedded directly into your digital products

MVP Live in 2 Days

1. Define
Initial data set and assistant behavior (tone, context, scope)

2. Load & Run
Upload content and launch the assistant in a test setup

⚑ MVP Live

3. Integrate
Connect to your tools or environment (e.g. Teams, Slack, Jira)

4. Improve
Iterate based on usage, feedback, and new data

Use Cases

Internal Knowledge Base Assistant

Access to HR materials, onboarding guides, ISO documentation, internal workflows, and SOPs. Reduces repetitive questions and accelerates onboarding and knowledge sharing.

Legal Document Assistant

Search for contracts, clauses, NDAs, GDPR documents, and more. Speeds up legal review and internal compliance processes.

Technical Documentation Assistant

Support for developers, QA testers, and operations teams. Reduces dependency on senior leads and helps onboard new team members faster.

Customer-Facing AI Support

AI-enhanced FAQ and SLA assistant integrated into websites or mobile apps. Provides instant answers, reduces ticket volume, and improves support responsiveness.

Personalized Sales Assistant

Assists with product comparisons, pricing, and recommendations. Delivers more accurate responses than static catalogs and enhances sales team performance.

Security and Reliability

- All data is processed in secure, isolated environments
- Hosting options include T4 private cloud, public cloud (AWS/GCP), or on-premise
- Suitable for both static and dynamic data

- Full transparency: each answer includes traceable source information
- Designed for enterprise-level privacy, security, and control
